

This listing of claims replaces all prior versions, and listings of claims in the instant application:

**Listing of Claims:**

1. (Previously Presented) A method for device location sensitive data routing comprising:

detecting a signal at a location wherein said signal emanates from a portable, electronic device wherein said signal contains a user identifier wherein said user identifier identifies a user;

transmitting via a phone system to a routing device said user identifier and a list of one or more communications devices wherein said communications devices are at said location; and

rerouting one or more electronic communications to said communications devices wherein said electronic communications are intended for said user.

2. (Cancelled) Previously cancelled, without prejudice.

3. (Previously Presented) A method for device location sensitive data routing comprising:

detecting a signal at a location wherein said signal emanates from a portable, electronic device wherein said signal contains a user identifier wherein said user identifier identifies a user;

transmitting via e-mail to a routing device said user identifier and a list of one or more communications devices wherein said communications devices are at said location; and

rerouting one or more electronic communications to said communications devices wherein said electronic communications are intended for said user.

4. (Original) The method of claim 1 wherein said portable, electronic device is a cellular phone.

5. (Original) The method of claim 1 wherein said portable, electronic device is a PDA.

6. (Original) The method of claim 1 wherein said signal is a radio signal.

7. (Original) The method of claim 1 wherein said signal is an infrared signal.

8. (Previously Presented) The method of claim 1 wherein, said signal emanates via a connection line further wherein, said connection line couples said portable, electronic device and a sensor.

9. (Original) The method of claim 1 wherein said electronic communications are phone calls.

10. (Original) The method of claim 1 wherein said electronic communications are e-mail messages.

11. (Original) The method of claim 1 further comprising: coupling a cellular phone to a non-wireless phone line.

12. (Original) The method of claim 1 further comprising: configuring said routing device to perform an action, if a condition is met.

13. (Previously Presented) The method of claim 12 wherein said condition comprises said user first appearing.

14. (Previously Presented) The method of claim 12 wherein said condition comprises said user leaving said location.

15. (Original) The method of claim 12 wherein said action is updating a web page.

16. (Original) The method of claim 12 wherein said action is sending an e-mail message.

17. (Previously Presented) A device location sensitive data router comprising:

a detector configured to detect a signal at a location wherein said signal emanates from a portable, electronic device wherein said signal contains a user identifier wherein said user identifier identifies a user;

a transmitter configured to transmit via a phone system said user identifier and a list of one or more communications devices wherein said communications devices are at said location; and

a routing device configured to receive said list and said user identifier wherein said routing device is further configured to reroute one or more electronic communications to said communications devices wherein said electronic communications are intended for said user.

18. (Cancelled) Previously cancelled, without prejudice.

19. (Previously Presented) A device location sensitive data router comprising:

a detector configured to detect a signal at a location wherein said signal emanates from a portable, electronic device wherein said signal contains a user identifier wherein said user identifier identifies a user;

a transmitter configured to transmit via e-mail said user identifier and a list of one or more communications devices wherein said communications devices are at said location; and

a routing device configured to receive said list and said user identifier wherein said routing device is further configured to reroute one or more electronic communications to said communications devices wherein said electronic communications are intended for said user.

20. (Original) The device location sensitive data router of claim 17 wherein said portable, electronic device is a cellular phone.

21. (Original) The device location sensitive data router of claim 17 wherein said portable, electronic device is a PDA.

22. (Original) The device location sensitive data router of claim 17 wherein said signal is a radio signal.

23. (Original) The device location sensitive data router of claim 17 wherein said signal is an infrared signal.

24. (Previously Presented) The device location sensitive data router of claim 17 wherein,

    said signal emanates via a connection line further wherein,  
    said connection line couples said portable, electronic device and a sensor.

25. (Original) The device location sensitive data router of claim 17 wherein said electronic communications are phone calls.

26. (Original) The device location sensitive data router of claim 17 wherein said electronic communications are e-mail messages.

27. (Original) The device location sensitive data router of claim 17 further comprising:

a cellular phone coupled to a non-wireless phone line.

28. (Original) The device location sensitive data router of claim 17 wherein said routing device is further configured to perform an action, if a condition is met.

29. (Previously Presented) The device location sensitive data router of claim 28 wherein said condition comprises said user first appearing at said location.

30. (Previously Presented) The device location sensitive data router of claim 28 wherein said condition comprises said user leaving said location.

31. (Original) The device location sensitive data router of claim 28 wherein said action is updating a web page.

32. (Original) The device location sensitive data router of claim 28 wherein said action is sending an e-mail message.

33. (Currently Amended) A computer program product comprising:

a computer usable readable medium having computer readable program code embodied therein configured to route data, said computer program product comprising:

computer readable code configured to cause a computer to detect a signal at a location wherein said signal emanates from a portable, electronic device wherein said signal contains a user identifier wherein said user identifier identifies a user;

computer readable code configured to cause a computer to transmit via a phone system said user identifier and a list of

one or more communications devices wherein said communications devices are at said location to a routing device; and

computer readable code configured to cause a computer to reroute one or more electronic communications to said communications devices wherein said electronic communications are intended for said user.

34. (Cancelled) Previously cancelled, without prejudice.

35. (Currently Amended) A computer program product comprising:

a computer usable readable medium having computer readable program code embodied therein configured to route data, said computer program product comprising:

computer readable code configured to cause a computer to detect a signal at a location wherein said signal emanates from a portable, electronic device wherein said signal contains a user identifier wherein said user identifier identifies a user;

computer readable code configured to cause a computer to transmit via e-mail said user identifier and a list of one or more communications devices wherein said communications devices are at said location to a routing device; and

computer readable code configured to cause a computer to reroute one or more electronic communications to said communications devices wherein said electronic communications are intended for said user.

36. (Original) The computer program product of claim 33 wherein said portable, electronic device is a cellular phone.

37. (Original) The computer program product of claim 33 wherein said portable, electronic device is a PDA.

38. (Original) The computer program product of claim 33 wherein said signal is a radio signal.

39. (Original) The computer program product of claim 33 wherein said signal is an infrared signal.

40. (Previously Presented) The computer program product of claim 33 wherein,

    said signal emanates via a connection line further wherein,  
    said connection line couples said portable, electronic device and a sensor.

41. (Original) The computer program product of claim 33 wherein said electronic communications are phone calls.

42. (Original) The computer program product of claim 33 wherein said electronic communications are e-mail messages.

43. (Original) The computer program product of claim 33 further comprising:

    computer readable code configured to cause a computer to couple a cellular phone to a non-wireless phone line.

44. (Original) The computer program product of claim 33 further comprising:

    computer readable code configured to cause a computer to perform an action, if a condition is met.

45. (Previously Presented) The computer program product of claim 44 wherein said condition is said user first appears at said location.

46. (Previously Presented) The computer program product of claim 44 wherein said condition comprises said user leaving said location.

47. (Previously Presented) The computer program product of claim 44 wherein said action comprises updating a web page.

48. (Original) The computer program product of claim 44 wherein said action is sending an e-mail message.
